Module 4: Amazon EC2

Demo Document 2

**edureka!**

edureka!

Creating a Custom AMI
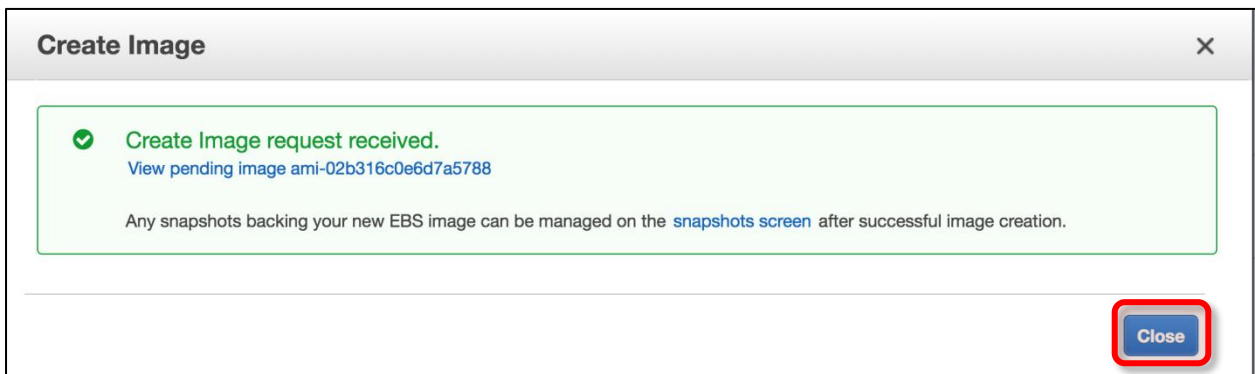

Step 1: Create an AMI

- Select the existing EC2 instance you have created, and in actions, choose image and click on

- Provide a name for the image and click on create

- After successfully image created it will be shown in AMI panel

Step-2: Launch an EC2 Instances using your AMI

- From the My AMIs choose your AMI and launch the instance as shown in demo 1

Step-3: Launch an instance using this AMI

- Connect to this instance using SSH
- It will have all the software installed on the old instance
